Elevating Shipment Visibility Across Supply Chain

SKY Plus - The Digital Track Board

Are you monitoring shipments or chasing them?

Moving blind folded, leads to frequent disruptions.

Working reactively not proactively?

Missing Inbound and outbound visibility?

Milestones assumed, not confirmed?

Monitoring by chasing updates?

Invoices paid on trust, not data?

SKY Plus - The Digital Track Board Because What You See, You Control

Sky+ is a plug-n-play B2B digital track board for your control tower to take real control of the shipments by bringing clarity, control and conversations into logistics. Automated notifications enables team to monitor by exceptions instead of chasing every shipment.

Why SKY PLUS?

- Tracks shipments in real time
- AI enabling tracking based on BOL.
- Records planned vs actual milestones
- Offers a single, live visibility layer
- Sends smart notifications to concerned teams
- Integrate with Microsoft Teams
- Easy to plug. Easy to scale. Zero disruption

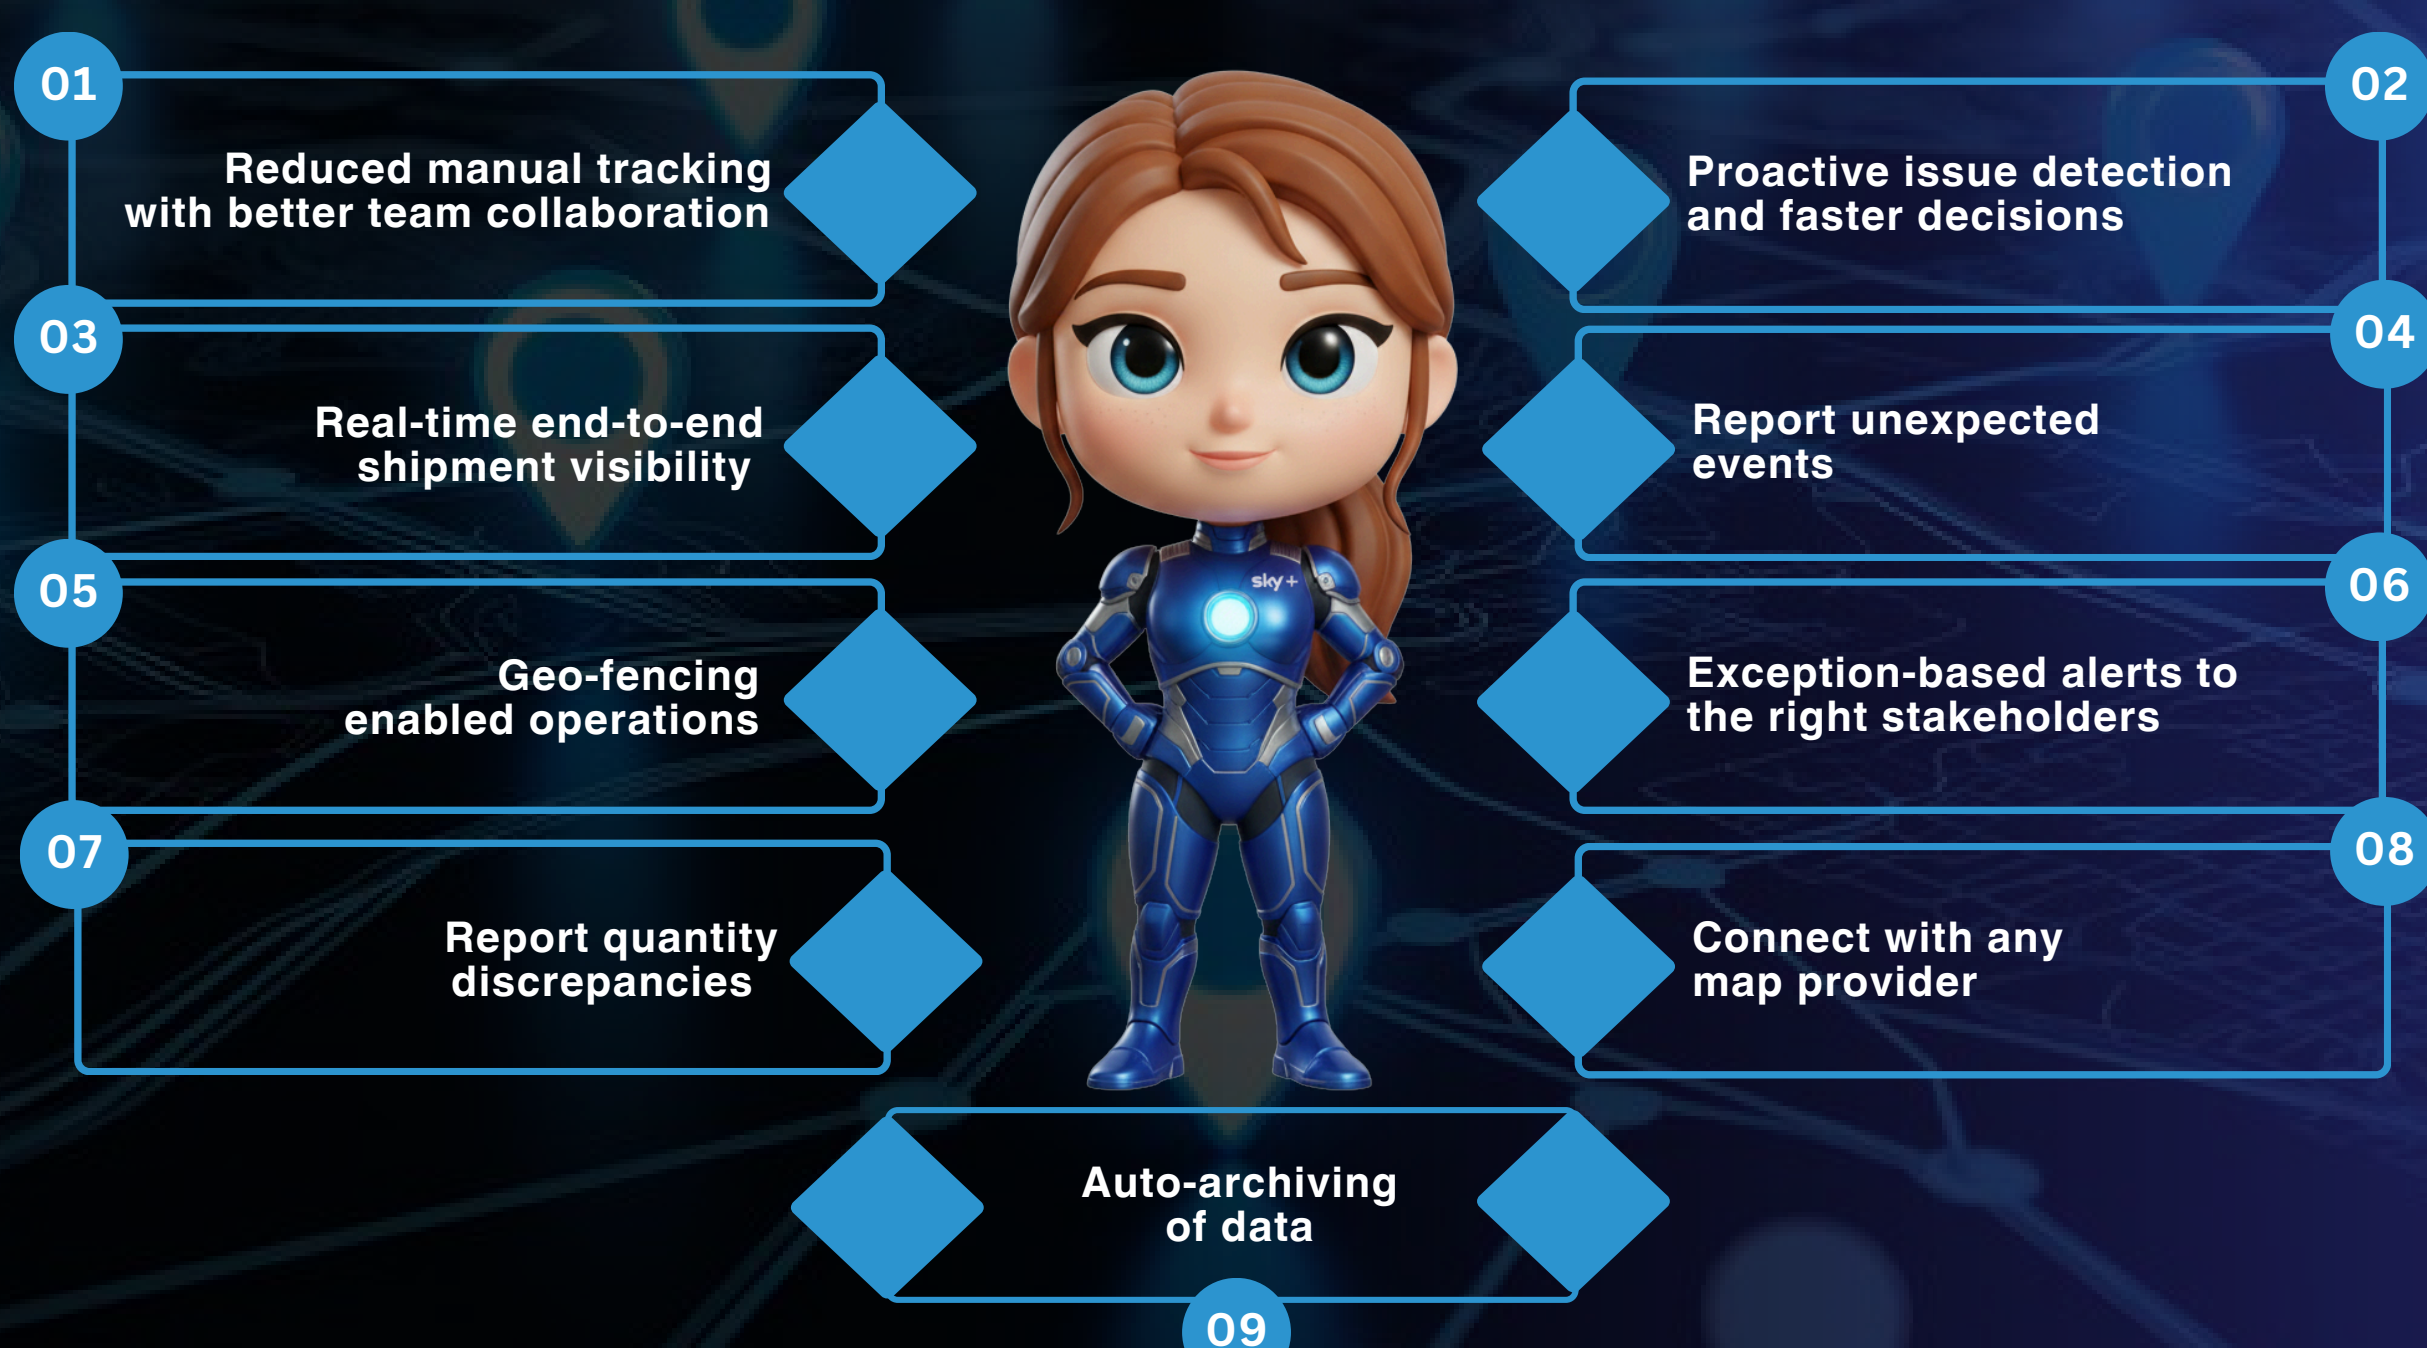

What makes SKY PLUS - the first choice ?

- Zero-footprint, lightweight—built for B2B shippers
- Tracks milestones, not just moving location dots
- Captures real timelines automatically
- Smart alerts tailored by shipment, event, or team
- Designed for collaboration, not passive monitoring
- Seamlessly integrated with SAP TM
- Plug-and-play deployment in just 3-4 weeks

Key Benefits

Built for Mobility, Powered by SAP, Connected End-to-End
