

Eliminating the Gap Between Email and SAP

Pluto Automate: The Intelligence Layer Between Email and SAP

Still trapped in email threads?

If yes, automation hasn't reached your inbox yet, and you need a fix urgently

Still raising Purchase Orders from emails?

Re-typing PDFs and Excel into SAP?

Chasing clarity across long email threads?

Fixing errors after the document is created?

Dependent on SAP teams for every small update?

What's Really Broken ?

- Emails ≠ structured data
- Manual interpretation = errors
- RPA breaks when formats change
- Portals slow adoption
- SAP becomes a bottleneck instead of a backbone

The gap isn't technology, It's translation

Introducing Pluto-Automate: An AI powered add-on that understands intent

Pluto-Automate is built for enterprises drowning in emails, attachments, and unstructured requests—and turns them into validated, compliant SAP transactions in real time.

Purchase Order creation from emails

PO modifications & updates

Document-based transaction creation

Status queries & confirmations

Exception handling

Stakeholder communication

How Pluto-Automate Works?

01

Email Comes In

Purchase request, change, update—any format.

SAP Rules Applied

Validation, tolerances, approvals, compliance

02

Intent Is Understood

Create PO? Modify quantity? Update delivery date?

SAP Document Executed

Created or updated—accurately, traceably.

03

Data Is Interpreted

Emails, PDFs, Excel, scanned docs—handled intelligently.

Response Sent Back

Confirmation or exception—automatically.

04

05

06

Why Pluto-Automate?

01

Conversation-First Automation

03

SAP-Native Thinking

05

Safer Than Manual Processing

02

Context-Aware AI

04

Zero-Change Adoption

06

Smarter Than P2P Tools

Highlights

Up to 90% reduction in manual SAP effort

3–5× faster document creation cycles

100% traceability & audit readiness

Scales operations without increasing headcount

70–80% fewer processing errors

Higher adoption with zero training cost

Available on SAP Store
